

Welcome to the website of the Buy Smart+ project

The project Buy Smart+ was completed in September 2014. For up-to-date information please visit the website of the new project Green ProcA: www.gpp-proca.eu

The central strategic objective of the project is to increase the share of energy efficient procurement in Europe. This will lead to a higher market impact and therefore support the production and the use of energy efficient goods and services.

We are glad to continue our action to support the implementation of greenprocurement with the project Buy Smart+ since March 2012.

The project is addressed to both private companies and public authorities. Aside from answering general questions we offer procurement tools for the product groups building components, green electricity, household appliances, lighting, office equipment and vehicles.

Please visit our national sub sites listed in the upper navigation for specific information.

The project Buy Smart offers:

- [Consultation](#)
- [Guidelines and Procurement Tools](#)
- [Procurement Directives](#)
- [Information on Labels](#)
- [News](#)
- [Good Practice Database](#)
- National Newsletters

The [Publishable Report](#) presents the results of the precursor Buy Smart project and provides an overview over the measures already taken.
